

# Immersive Learning with Augmented, Virtual and Mixed Reality

Nadia Abdallah  
Tiffany Grant-Simmons  
Jeffrey Kontio  
Melissa Welz

# REVIEW

:

- (1) Overview of the technology
- (2) Applications
- (3) Benefits and limitations
- (4) Agenda for future research

# OVERVIEW OF TECHNOLOGY

Do you know when the first VR headset was created? Keep listening to find out!

# Virtual Reality

1838

1935

1957

1981

1993

1995

2010

20??

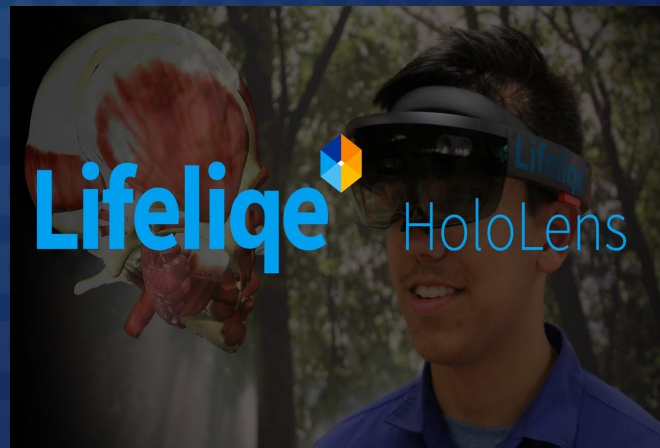

Fun fact - the View Master from the 1960s were modernized stereoscopes. They can still be purchased today for use

# Augmented Reality

Fun Fact As of August 2022, Pokemon Go had over 78.2 million daily users, making it still a very popular mobile game

# Mixed Reality

Fun fact MR is expected to be a \$3.7 billion industry by the year 2025

# Applications

# Examples

- Travel without leaving the classroom
  - Other countries
  - Museums
  - Zoos
- Explore places otherwise unreachable
  - Space
  - Deep in the ocean
  - Visit the past
- See beyond what is visible
  - Anatomy
  - Electro-magnetic fields
  - Infrared

# More Examples

- Biology Labs
  - Animal dissection
  - Tree anatomy
  - Human anatomy
- Geometry
  - Fold and unfold 3D shapes
  - Change shape of 2D shapes
- Physics
  - Build a circuit in VR/AR
  - Play around with different gravity

# Platforms

- Lenovo VR Classroom
  - <https://techtoday.lenovo.com/us/en/solutions/vr-classroom>
- ClassVR
  - <https://www.classvr.com>
- Google Arts & Culture
  - <https://artsandculture.google.com>
- Steam w/Oculus or HTC Vive
  - <https://www.oculus.com>
  - <https://www.vive.com>
- Youtube
  - <https://bit.ly/YouTubeVRChannel>

# Activity!

- Using the Google App (available for Android and iOS) try AR for yourself!
  - Take a picture or video and post it in the “AR Activity” thread
    - On your device open the Google App (can be downloaded from your app store.
    - Search for an animal, object, or place
    - Tap “View in 3D” (you may need to scroll down)
    - To interact with the 3D Result tap “View in your space”
    - Follow the on-screen instructions.

Full instructions, including a list of what you can search for, can be found at:  
<https://bit.ly/2022EDTC805G3>

# Benefits and Limitations

# BENEFITS

## Real-life learning experience:

Through VR, learning feels close to real-life. You are no longer obligated to learn about museums by visiting.

## Safe:

VR is a safe way of learning, while using technology.

# BENEFITS

## Precise:

Through VR, you experience minute details that seem as close to “real” as possible.

## Learning in all places:

VR is now used in many different areas, not only schools. You are able to use VRs in businesses and touristic areas as well.

# LIMITATIONS

## Obsessive:

While VR has its advantages, it is also obsessive and easily addictive for all.

## Expensive:

The cost of a VR is not always suitable to learners in certain part of the world, due to the cost.

# LIMITATIONS

## Isolation:

VR can create an addictive environment that leads to pure isolation for those who use it.

A man is shown in profile, wearing a VR headset. The scene is lit with a strong blue and red glow, creating a futuristic atmosphere. The background is dark blue with some light spots and white lines in the corners, suggesting a digital or virtual environment.

# THE FUTURE OF VIRTUAL REALITY

# THE FUTURE OF VIRTUAL REALITY

## DINING

You will be able to travel virtually to different places and immerse yourself in certain environments while tasting the dishes from these locations.

## EDUCATION

In classrooms, the use of VR allows students to better retain knowledge and helps students with learning difficulties.

## MEDICINE

The Spanish National Research Council has succeeded in reducing the effects of Parkinson's in several patients by applying a treatment that uses Virtual Reality.

# THE FUTURE OF VIRTUAL REALITY

## ENTERTAINMENT

Users can enter a scene in a video game or practice extreme sports without moving from their couch.

## ARCHITECTURE

Virtual Reality architects are going to better envisage a space and present the project to their clients.

## MILITARY

The UK of Defence uses Virtual Reality for training in simulated environments.

# THE FUTURE OF VIRTUAL REALITY

## Industry

Digital Twins are exact digital copies of physical objects that factory workers can practice on and test in a virtual world.

## Culture/Art

Some museums and galleries offer virtual visits or immersive experiences to help understand the history and culture associated with each work.

## Media

Immersive journalism takes the user to the places where events have occurred with live streaming of 360 degree videos.

# ENGAGE

COMMUNICATE / TEACH / LEARN

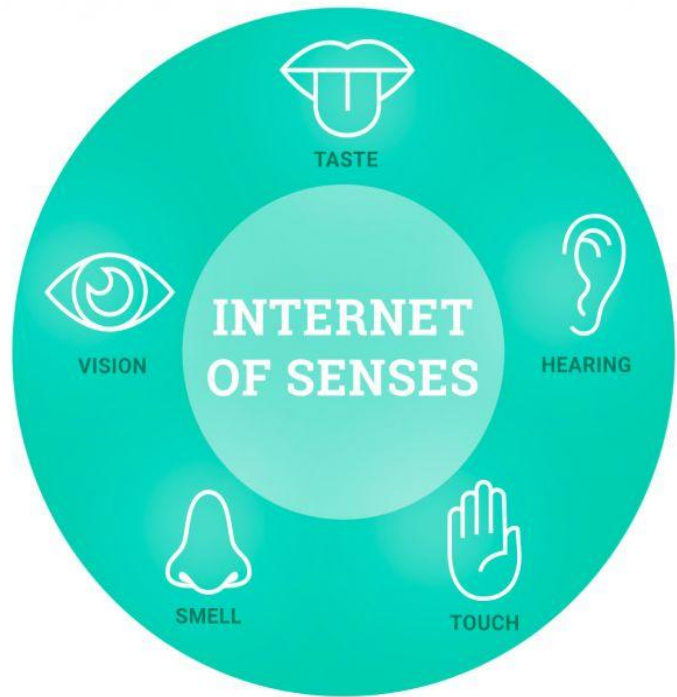

# Telasuit

virtual reality reinvented

The world's first full-body haptic feedback, motion capture, thermo controlled suit. Enjoy incredible real world sensations as never before.

# DISCUSSIONS

1. Looking within your own curriculum, how would you embed VR into one of your lessons? Provide examples.
2. Do you feel that Augmented Reality, Virtual Reality, or Mixed Reality provide better learning opportunities? Which do you feel are more engaging?
3. Fun Activity! Get out your Cyclops VR Goggles that we received in the Summer Institute. I want you to put your goggles on and click on this VR 360 video. Since Halloween is coming up I would like you to venture into the, “ The Stranger Things” world. Here is the link :

<https://www.youtube.com/watch?v=RX01XBsLFg4&list=LL&index=2&t=3s>

Are you brave enough to encounter Vecna? Let us know how you did! Did you escape? What did you like about this VR experience? Did it seem realistic to you? What might have you added to make this experience more realistic?
